Excerpt: . . . being sent to the calenders for the final polishing. The degree of polish given the paper depends upon the amount of pressure used on the calender rolls, and the number of times that the sheet is passed through the machine. This paper is somewhat similar to the glazed papers used for covering boxes, and for making many fancy articles. But in these papers wax is added to the coating, giving it the familiar gloss. SPECIAL USES OF PAPER In recent years paper has been used for a greater variety of things than almost any other substance. Even to catalogue these would require a volume. And curiously enough these uses are as diversified and frequently as diametrically opposed to each other as possible. Treated in a certain manner paper may be used as tinder for lighting fires; or if treated by a different process the same fibers may be used as a component of fireproof substances, such as the drop-curtains in the theaters and the packing of engines. By proper manipulating it is made into soft, pliable, felt-like chamois fiber, or compressed and hardened into an ideal material for car wheels. In short, it can be made to take the place of down, or steel, or almost any other substance of intermediate density. When the manufacture of paper car wheels was announced a few years ago it was generally supposed that this was simply the experiment of some imaginative enthusiast. Few people took the announcement seriously....
