

Economic Development: International Restraints to Competitiveness of the U.S. Heavy Electrical Equipment Industry: NSIAD-83-51

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The heavy electrical equipment industry consists of a few large multinational manufacturers that dominate their home markets and compete for the remaining world markets.

Pursuant to a congressional request, GAO reviewed the worldwide competitiveness of U. S. manufacturers of heavy electrical equipment, focusing on: (1) buy-national practices of the United States and selected foreign governments to restrain access to domestic markets; (2) noncompetitive practices, such as the use of subsidies, to promote exports; and (3) concerns of U. S. firms about other barriers attributable to U. S. statutes and regulations. GAO found that, in many countries, the major purchasers of heavy electrical equipment are government-owned utilities whose buy-national policies generally restrict procurement of this equipment to domestic sources. The U. S. market is open to foreign competition and the major users of heavy electrical equipment are private utilities. A recent survey indicated that almost half of these utilities give preference to domestic goods and that only a small percentage of foreign equipment has been purchased in the past 5 years. Federal purchases of heavy electrical equipment follow policies pursuant to the...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
